

# A NEW AND UNSETTLING FORCE

## A FUSION MOVEMENT RISING UP

### WE DEMAND...

- An end to unjust wars fought in the name of the American people, and amends be made for the destruction caused.
- An end to war profiteering and military contractors.
- The demilitarization of the border.
- An overhaul of the military that stops sexual harassment and assault and the cultural attitudes that protect abusers.
- The end of recruiting in high schools and that the enlistment age be raised to the legal drinking age - 21.
- That the VA healthcare system remain public and fully-funded.
- A reduction in total spending for the Department of Defense.
- The closing of Guantanamo Bay.
- The DOD follow through with the scheduled public audit.
- The end to automated warfare perpetuated by drones.
- That all military bases be cleaned up so it is safe for the military, their families, and communities that have military installations.
- The end of the use of depleted uranium and multiple deployments that harm members of the military.
- A halt to the 1033 program's redistribution of weapons of war to the police.
- That these private weapons funds be funneled towards a just transition for a green infrastructure, healthcare for all, education system, forgiveness of student debt, and programs of social uplift.

The solutions to these issues are found in the vision of Rev. Dr. Martin Luther King, Jr., who called for a complete moral revolution of values in American society. Together, we can stop the root causes of poverty and provide a better life for people at home and abroad.
