

**SAVE OUR VA!**

**The MISSION Act that went into effect on June 6, could lead to the dismantling and privatization of the VA Healthcare system that our veterans want and need!**

**On June 6, 2019, the VA rolled out the Veterans Community Care Program (VCCP) as part of the MISSION Act.**

These regulations are deeply troubling because they will channel millions of veterans to private sector providers. With little oversight and with mass vacancies needing filling in the VA system, this is a direct attempt to undermine the VA itself, a healthcare system the Rand Corporation has found in many instances outperforms private-sector care in health care quality and that also receives high marks in patient satisfaction.

**Please take two minutes to call your Representatives and U.S. Senators at (202) 225-3121 and tell them to “Fill the 50,000 vacancies. Stand with veterans and VA caregivers during contract negotiations. Don’t privatize our VA!”**

**VETERANS SAY NO TO PRIVATIZATION**
