

Help Fix, Fund & Fully Staff the VA

**They Want to Privatize Veterans VA Healthcare!
Congress Is Doing this FAST!**

Since 2014, when the CHOICE program began, millions of vets have been sent into the private healthcare sector. Many vets are dissatisfied with CHOICE and wait times for some vets are as long or longer in the private sector than they are at the VA.

Legislative proposals in Congress are threatening to drastically change how veterans receive healthcare. The Veterans Health Administration is under attack by groups who are encouraging the elimination of government programs and pushing the idea that only the private sector 'works'

**We in Veterans for Peace (VFP) fight back
"Stop VA Privatization, Fix, Fund & Fully Staff the VA."
